WELCOME

The Psychology Training Committee at the Alaska VA Healthcare System (AVAHs) greatly appreciates your interest in our doctoral clinical psychology internship. This program aims to train interns in the scholar-practitioner model to be able to provide evidenced based and recovery focused clinical care, in addition to serving as a critical consumer of scientific research. We have been accredited by the American Psychological Association’s (APA) Office of Program Consultation and Accreditation since 2011. Our site visit was in 2018; results are pending. For accreditation information, you may contact the American Psychological Association’s Commission on Accreditation (CoA):

Office of Program Consultation and Accreditation
750 First St, NE
Washington, DC 20002-4242

Telephone: (202) 336-5979 apaaccred@apa.org

We value the contributions interns make to our training program and the care of Alaskan Veterans at the Alaska VA Healthcare System, and we have a strong commitment to promoting the development of interns’ clinical skills and professional competences, all while honoring interns’ individualized professional goals. Beyond the contributions interns have made during their internships, several previous interns have taken staff psychologist positions here and continue to contribute to the legacy of this program.

In addition to the benefits of our scientist-practitioner training program, living in the Anchorage and Mat-Su area offers the comfort of a metropolis, with the best of outdoor living. Situated at the base of the beautiful Chugach Mountains and bordering the 495,000-acre Chugach State Park, Anchorage residents can partake in a plethora of recreational activities, from downhill skiing at the Alyeska Resort, to salmon fishing near downtown Anchorage in Ship Creek, to hiking on the popular Flattop Mountain. Alaska also has vast entertainment and cultural opportunities, including museums, a performing arts center and an active brewery community. We truly love working and living in Anchorage.

Thank you for your interest in our program. Please let us know if you have any questions as you consider your internship opportunities. We look forward to reviewing your application.

Sincerely,

Daniel Gonzales, Ph.D.

ABOUT THE ALASKA VA HEALTHCARE SYSTEM

Overview

The Veteran’s Health Administration (VHA) is the national’s largest integrated health care system, providing care to more than 9 million Veterans and employing more than 300,000 full time health care professionals and support staff. The VHA is organized into 21 regional districts, also known as Veterans Integrated Service Networks or VISNs, The Alaska VA Healthcare System is a part of VISN 20 (Northwest Network), which includes the states of Alaska, Washington, Oregon, most of the state of Idaho and one county in Montana and California. This VISN covers 23% of the land mass in the United States. Within VISN 20, there are six medical centers, one independent outpatient clinic, one rehabilitation center, 20 community based outpatient clinics, and one mobile clinic. VISN 20 provides care to 1.1 million Veterans who live in the Pacific Northwest and Alaska, and has the highest total Veterans served of any VISN.
The Alaska VA Healthcare System (AVAHS) provides care to Alaska’s Veterans. AVAHS offers primary, specialty, and mental health outpatient care through its main outpatient clinic, which was newly built in 2011 and offers a beautiful view of the Chugach Mountains from the main lobby. Services are provided through a Joint Venture with the United States Air Force on nearby Elmendorf Air Force Base, as well as through purchased care arrangements with the community hospitals. The facility also features a comprehensive Homeless Veteran Service, consisting of a 50 bed Domiciliary Residential Rehabilitation Program, a 24 bed Compensated Work Therapy Transitional Residence Program, HUD/VA Supported Housing, and Homeless Veterans Supported Employment Programs and Veterans Justice Outreach. In addition to our main facility in Anchorage, the AVAHS includes three Community-Based Outpatient Clinics (CBOC) in Fairbanks, Kenai and the Mat-Su, and one VA Outreach Clinic in the state capital of Juneau.

**Veteran Population**

According to the National Center for Veterans Analysis and Statistics, in 2016 Alaska was home to over 68,000 Veterans, 33,000 of whom are enrollees. Alaska is more densely packed with Veterans compared to the national average, with 13.1% of the adult Alaskan population being Veterans, compared to the 6.6% of the national population who are Veterans. In fact, Alaska was the state with the highest percentage of Veterans per capita in 2016. Veterans are often drawn to active lifestyle the Alaska provides.

The diversity of Alaskan Veterans allows interns at the Alaska VA Healthcare System to gain skills in multicultural competence. Of the Veterans in Alaska, 13.3% are female (national average of 9.1%), which places Alaska in third for the state with the highest percent of Veterans who are women. While Veterans of all ages live in Alaska, this internship offers opportunities to work with younger Veterans. Compared to the national average of 46.9% of the Veteran population being above 65 years old, only 29.8% of the Alaska Veteran population is above 65 years old. The largest age groups for Alaskan Veterans includes 60-69 (23%), 50-59 (21.2%), 40-49 (15.3%), and 30-39 (14.3%) Alaskan Veteran
come from all service eras, with the most coming from the Gulf War Era (49.7%), followed up the Vietnam Era (30.8%). Approximately 21% of Alaskan Veterans are racial and ethnic minorities, with the largest minority ethnic groups being Alaska Native or American Indian (6.6%), African American/Black (5.9%), multiracial (4.9%) and Asian (2.1%). Interns at the Alaska VA will get unique opportunities to learn about Alaska Native cultures and ways of being. The Alaska VA also has a Lesbian, Gay, Bisexual and Transgender (LGBT) care coordinator to help promote patient-driven healthcare for the numerous Alaskan LGBT Veterans.

**Mission**
The Mission of the Veteran’s Health Administration is to honor America’s veterans by providing exceptional care that improves their health & well-being.

**Vision**
The Veterans Health Administration will continue to be the benchmark of excellence and value in health care and benefits by providing exemplary services that are both patient centered and evidence based. This care will be delivered by engaged, collaborative teams in an integrated environment that supports learning, discovery and continuous improvement. It will emphasize prevention and population health and contribute to the nation's well-being through education, research and service in National emergencies.

**Core Values**
The Department of Veterans Affairs (VA) has Core Values that apply across the entire VA organization. These core organizational values are the foundation of VA culture and support VA’s mission to provide the best care and services to Veterans, their families, and beneficiaries.

Because **I CARE**, I will….

**Integrity**
Act with high moral principle. Adhere to the highest professional standards. Maintain the trust and confidence of all with whom I engage.

**Commitment**
Work diligently to serve Veterans and other beneficiaries. Be driven by an earnest belief in VA’s mission. Fulfill my individual responsibilities and organizational responsibilities.

**Advocacy**
Be truly Veteran-centric by identifying, fully considering, and appropriately advancing the interests of Veterans and other beneficiaries.

**Respect**
Treat all those I serve and with whom I work with dignity and respect. Show respect to earn it.

**Excellence**
Strive for the highest quality and continuous improvement. Be thoughtful and decisive in leadership, accountable for my actions, willing to admit mistakes, and rigorous in correcting them.
MORE INFORMATION ON THE ALASKA VA HEALTHCARE SYSTEM CAN BE FOUND AT:

ABOUT THE TRAINING PROGRAM

Psychology Setting
Psychologist positions are found in diverse settings and capacities throughout the Alaska VA Healthcare System. Alaska VA psychologists provide a broad array of clinical services in military sexual trauma, PTSD, addictions, health psychology and behavioral medicine, neuropsychology, disability evaluations, and psychosocial rehabilitation. Psychologists serve in leadership positions at the Alaska VA and several have had faculty appointments at the University of Alaska Anchorage. In addition to the Doctoral Psychology Internship, the Alaska VA also provides training for second-year Master’s in Social Work Interns, Physician Assistant Clerkships, and Psychiatric Nurse Practitioner clinical rotations.

Program Aims and Profession-Wide Competencies (PWCs)
Our internship is a generalist program that whose aim is to prepare interns on broadening and extending their clinical and professional skills to become competent and effective professional psychologists working in culturally diverse urban, rural, and frontier healthcare environments. While some objectives are specific to each rotation, all training experiences focus on developing the following profession-wide competencies:

Assessment:
- Demonstrate current knowledge of functional and dysfunctional behaviors, including consideration of client strengths and weaknesses.
- Apply the knowledge of client strengths and psychopathology to the assessment process with sensitivity to cultural and individual differences.
- Select and apply assessment methods that draw from the best available empirical literature and that reflect the science of measurement and psychometrics.
- Collect relevant data using multiple sources and methods appropriate to the identified goals and questions of the assessment as well as relevant diversity characteristics of the service recipient.
• Interpret assessment results, following current research and professional standards and guidelines, to inform case conceptualization, classification, and recommendations, while guarding against decision-making biases
• Distinguish the aspects of assessment that are subjective from those that objective
• Communicate orally and in written documents the findings and implications of the assessment in an accurate and effective manner sensitive to a range of audiences

**Intervention:**
• Establish and maintain effective relationships with the recipients of psychological services.
• Develop evidence-based interventional plans specific to the service delivery goals.
• Implement interventions informed by the current scientific literature, assessment finding, diversity characteristics, and contextual variables
• Demonstrate the ability to apply the relevant research literature to clinical decision-making
• Modify and adapt evidence-based approaches effectively when a clear evidence-base is lacking
• Evaluate intervention effectiveness and adapt intervention goals and methods consistent with ongoing evaluation
• Demonstrate competent evidence-based psychotherapy skills in a variety of modalities (including group, individual and crisis intervention/risk assessment).

**Consultation and interdisciplinary skills:**
• Demonstrate knowledge and respect for the roles and perspectives of other professions
• Apply knowledge of consultation models and practices in direct or simulated consultation with individual patients and their families
• Apply knowledge of consultation models and practices in direct or simulated consultation with other health care professionals, interprofessional groups, or systems related to health and behavior

**Supervision:**
• Apply knowledge of supervision models and practices in direct or simulated practice with psychology trainees or other health professionals
• Demonstrate understanding of the ethical, legal, and contextual issues of the supervisor role
• Demonstrate knowledge of APA identified core competencies for supervision
• Provide helpful supervisory input in peer and group supervision

**Research:**
• Demonstrate the substantially independent ability to critically evaluate, apply, and disseminate research or other scholarly activities in professional practice (e.g.: case conference, presentations, publications, peer consultation in group supervision) at the local, regional, or national level
• Demonstrate the application of current literature, research, theory, and scientific foundations in intervention and assessment activities
• Demonstrate knowledge, understanding, and applications of evidence-based practice

**Professional values, attitudes and behaviors:**
• Behave in ways that reflect the values and attitudes of psychology, including integrity, deportment, professional identity, accountability, lifelong learning, and concern for the welfare of others
• Engage in self-reflection regarding one’s personal and professional functioning
• Engage in activities to maintain and improve performance, well-being, and professional effectiveness
• Actively seek and demonstrate openness and responsiveness to feedback and supervision
• Respond professionally in increasingly complex situations with more independence as s/he progresses across levels of training

**Ethical and Legal Standards:**
• Demonstrate knowledge and act in accordance with the current version of the APA Ethical Principles of Psychologists and Code of Conduct
• Demonstrate knowledge and act in accordance with the relevant laws, regulations, rules, and policies governing health service psychology at the organizational, local, state, regional, and federal levels
• Demonstrate knowledge and act in accordance with the relevant professional standards and guidelines
• Recognize ethical dilemmas as they arise and apply ethical decision-making processes to resolve the dilemmas
• Conduct self in an ethical manner in all professional activities

**Interpersonal and Communication Skills:**
• Develop and maintain effective relationships with a wide range of individuals, including colleagues, communities, organizations, supervisors, supervisees, and those receiving professional services
• Produce and comprehend oral, nonverbal, and written communications that are informative and well-integrated
• Demonstrate a thorough grasp of professional language and concepts
• Demonstrate effective interpersonal skills and the ability to manage difficult communication well

**Individual and Cultural Diversity:**
• Demonstrate an understanding of how their own personal/cultural history, attitudes and biases may affect how they understand and interact with people different from themselves
• Demonstrate knowledge of the current theoretical and empirical knowledge base as it relates to addressing diversity in all professional activities including research, training, supervision/consultation, and service
• Demonstrate the ability to integrate awareness and knowledge of individual and cultural differences in the conduct of professional roles (e.g.: research, services, and other professional activities). This includes having a framework for working effectively with populations not previously encountered or with populations whose group membership create conflict with their own
• Demonstrate the ability to independently apply their knowledge and approach in working effectively with the range of diverse individuals and groups encountered during internship

Diversity

The Alaska VA Psychology Internship gladly embraces the emphasis on individual and cultural diversity that contemporary psychology training requires. We have numerous Seminar topics that cover a range of issues of diversity, a monthly Diversity Journal Club, and a two-day immersive seminar at the Alaska Native Heritage Center.

Our dedication to the value of embracing diversity is partly driven by the diversity of Anchorage and Alaska itself. Anchorage is a city of tremendous diversity, including the three most diverse US Census tracts in the country. The Anchorage School District includes 96 different languages among its student population, including numerous Native Alaskan languages. One of the most surprising aspects about Anchorage to newcomers is the amazing diversity of cultures and cultural influences in this community, and it is noticed by "Lower 48" media:

http://www.slate.com/articles/life/tomorrows_test/2016/06/the_newcomers_center_has_made_anchorage_alaska_one_of_the_best_school_districts.html

Administrative Policies and Procedures

Our internship policy and procedure manual covers all domains applicable to our trainees, including, but not limited to (a) Administrative (e.g., training committee structure and function, intern's involvement in faculty meetings, intern selection, evaluations of interns, faculty, rotation, etc.); (b) Training (e.g., compliance with training and ethical requirements, outside placements, moonlighting, supervisor qualifications, rotation placement changes, etc.); and (c) Other (e.g., grievance procedures, disciplinary procedures.)

Leave/Holidays

Our authorized leave policy is the same that applies to all VA Psychology Training
Programs. Interns will have 10 days of paid federal holidays, 13 vacation days, and up to 13 sick days. Limited dissertation release time is available only upon approval of the Training Committee. Leave is accrued by each two week pay period, with interns earning 4 hours of sick leave and 4 hours of annual level each pay period.

**Stipend**
Interns receive a stipend in 26 biweekly installments. Each internship stipends are adjusted by locality to reflect the relative cost in different geographic areas. The last stipend increase was in 2017. Currently, the annual stipend will be $29,035.

**Benefits**
As with all employment within the federal government, interns will be eligible for health insurance, and life insurance. Please see [https://www.opm.gov/healthcare-insurance/](https://www.opm.gov/healthcare-insurance/) for details on available options.

**Liability**
When providing professional services at a VA healthcare facility, VA-sponsored trainee acting with the scope of their education programs are protected from personal liability under the Federal Employees Liability Reform and Tort Compensation Act 28, U.S.C.2679(b)-(d). Many interns also elect to get their own liability insurance through their own school's available policy.

**Due Process**
A specific policy is established to ensure and guide due process for all interns. Grievances covered by this policy include, but are not limited to (a) challenging a performance rating, (b) grievance against clinical, teaching, supervision, or other professional behavior of faculty member(s); or (c) challenging a program policy or procedure. (This policy does not deny the intern's right to grieve directly to the Chief of Staff, Equal Employment Opportunity, or the Human Resources Management Service.)

**Privacy**
Our privacy policy is clear: we will collect no personal information about you when you visit our website. Our internship program does not require self-disclosure.

**THE TRAINING YEAR**

**Program Structure**
The dates for the 2019-2020 training year are August 17, 2020, to August 13, 2021. As an introduction to a sense of a work-life balance, we adhere to a Monday through Friday schedule, averaging 40 – 45 hours per week. There is no on-call duty, nor any scheduled work obligations on weekends. We believe that interns should have a training experience that closely parallels that of staff psychologists; we want to enjoy where we live, and so should interns!

The Alaska VA Psychology Internship Program is structured to provide training in core
competency areas while maintaining the flexibility to provide individualized and developmentally-oriented training experiences for Psychology Interns. Training will take place in three four-month rotations:

1) Outpatient Mental Health PTSD Specialization
2) Health Psychology
3) Mental Health Residential Rehabilitation Treatment Program (MHRRTP)

The Outpatient Mental Health and Health Psychology rotations take place at the main VA clinic, while the MHRRTP rotation primarily takes place at the VA Domiciliary, located in mid-town Anchorage. The training committee seeks to consider interns’ previous experience and professional goals when deciding the order of the rotations.

Facility and Training Resources
Each intern will have a dedicated office with computers and phones in their corresponding location (main VA clinic or Domiciliary); digital recording equipment will be available to support clinical supervision and training activities. In addition to the support from psychology internship faculty and clinical staff, each intern will have administrative and program support for training and consultation with electronic medical record management, telemental health, and other clinical applications; and data management related to clinical workload, and program and facility performance improvement programs. Video-teleconferencing, “Live Meeting,” and "Smart Board" technologies are available to support seminars, clinical case conferences, and other trainings as well as clinical applications. The Alaska VA Healthcare System also has made a considerable investment in telehealth technology, which will support intern experiences in telemental health applications. Interns will also have accounts on the VA Talent Management System (TMS), which provides required and optional online training opportunities on a

The Alaska VA Healthcare System Medical Library offers access to all major psychology, medicine, and public health journals. The capacity for database searches of the card catalog, Medline, ERIC, CINAHL, HEALTH, New England Journal of Medicine, PsychLit (Psychological Abstracts), and many others is available on-site and remotely. There is an excellent electronic inter-library loan system for periodicals that are not available through the library. Interns also have access to a full array of psychological assessment materials.

The Ph.D. program in Community/Clinical Psychology at the University of Alaska Anchorage includes internship faculty and interns in seminar and other educational offerings, and options to participate in NIH-funded clinical research.

Supervision
Formal individual supervision (scheduled face-to-face contact with primary supervisor) is provided for at least two hours per week, and scheduled depending on intern and supervisor schedules by rotation. Interns are also required to attend two additional hours of group supervision per week (held for one hour each on Wednesdays and Thursdays).

A supervision contract is negotiated between the intern and the supervisor(s) at the
beginning of each rotation, focusing on the goals and competencies for the rotation.

**Evaluation**
At the beginning of the intern year, interns will complete a self-study which will be provided to each rotation supervisor. This self-study will allow the intern to communicate their perception of their competencies, and outline their training goals.

The self-study will be the basis of the beginning of the supervisory relationship. During the first rotation, interns will be evaluated at the midpoint (in mid-October) and at the end (in mid-December). In subsequent rotations, they will be evaluated at the end of each rotation. Interns will also be evaluating their supervisor's performance at the end of each rotation. There will also be an end of year overall evaluation of our program.

**Research**
Interns can request up to 4 hours per week for research time to work on their dissertation or other research projects. Previous interns have worked with the University of Alaska Anchorage on various research projects including training of community providers to work with refugees, ethical problem-solving, and college alcohol use. This facility does not conduct research.

**Seminars and Other Educational Opportunities**

**Intern Didactic Series**
Seminars occur on a weekly basis and are presented by various staff members, including non-psychologists. In addition to the staff presentations, interns each present two presentations (a formal case presentation and a research/literature review). Here is a partial list of Seminar topics in the past year:

- Complex PTSD and ACEs
- Military Sexual Trauma
- Prolonged Exposure Therapy – theory and practice
- Psychotherapy with Alaska Natives
- Transgender/Intersex Veterans
- LGBT Veterans
- Borderline PD and Dialectic Behavior Therapy
- Professional Boundaries
- Professionalism in Social Media
- Military Culture
- Intimate Partner Violence
- Mindfulness Based Stress Reduction
- Chronic Pain and Somatic Distress in Women
- CBT for Substance Use Disorders
- Psychotherapies for Women with Complex Trauma
- Cognitive Behavioral Couples Therapy
- Compensation and Pension examinations
- Privacy and Confidentiality in Rural Settings
- Compassion/Loving Kindness
- Smoking Cessation
- Sexual Dysfunction
- EPPP
- Rehabilitation Psychology
- Leadership Skills Development in Psychology
- Driving Capacity Evaluations
- Palliative Care
- Acceptance and Commitment Therapy
- Moral Reconsideration Therapy
Interns are required to participate in the Monthly Cultural Diversity Journal Club. The Journal Club is held the 2nd Wednesday of each month, and is facilitated by Dr. Camilla Madden. Interns are expected to host one Journal Club meeting, where they select the article and facilitate a discussion among the group members. Recent journal articles that have been discussed in this club include:

- Human Trafficking of Children and Adolescents: A Global Phenomenon with Horrific Health Consequences
- Healing the Hidden Wounds of Racial Trauma
- American Indian and Alaska Native Mental Health: Diverse Perspectives on Enduring Disparities
- Internalized Stigma Among Sexual Minority Adults: Insights From a Social Psychological Perspective
- Contributions from Ethics and Research that Guide Integrating Religion into Psychotherapy
- An Exploration of How Psychotic-like Symptoms are Experienced, Endorsed, and Understood from the National Latino and Asian American Study of American Life
- Contributions from Ethics and Research That Guide Integrating Religion into Psychotherapy
- Latino Veterans with PTSD: A Systematic Review

Other off-site training opportunities

Interns have taken advantage of various off-site training opportunities. Each year interns have participated in a two-day cultural training at the Alaska Native Cultural Heritage Center, which has been a favorite training of previous interns. Previous interns have attended the Alaska LBGT Pride Day with members from the Transgender Support Group. Interns have also presented poster presentations at conferences, such as the American Psychological Association. In the spirit of optimizing an intern’s training experience, our program is committed to flexibility in the content and structure of an intern’s yearlong training, as provided by the collective skills and experience of our faculty.

There are also many local behavioral health conferences and trainings available that interns can participate in (some free and others for a specific training cost). While some opportunities are subject to local resources and training priorities, annual trainings opportunities or trainings that occur more regularly include:

- The Regional Alcohol and Drug Abuse Counselor Training (RADACT) program’s Annual School on Addictions and Behavioral Health
- Alaska Psychiatric Association’s Annual Continuing Medical Education Conference
- Southcentral Foundation’s Annual Nuka System of Care Conference
- Alaska’s Annual Behavioral Health Provider Education Conference
- Annual Infant & Early Childhood Mental Health Institute & Child, Adolescent & Family Behavioral Health Conference
- The National Indian Child Welfare Association’s Annual Protecting Our Children: National American Indian Conference on Child Abuse and Neglect
- The Alaska Training Cooperative’s Hearing Voices Workshop
- The University of Alaska’s annual Behavioral Sciences Conference of the North
- Monthly Fifth Friday socials (non-CE training, colloquium, social, or collegial events) for members of the Alaska Psychological Association.

Service Requirements
Interns are given opportunities to aid in the development of the training program and the Alaska VA Healthcare system. These opportunities include, but are not limited to, service on the Training committee during one rotation, participation in internship interviews and open house, and development of orientation and training materials for future interns. Interns have also worked with supervisors to sit in on VA committees that they belong to, such as the Medical Record Review Committee, and Disruptive Behavior Committee.

Requirements for Completion of Internship
It is expected that each intern will attend all scheduled didactic presentations and actively engage in the training rotations for the full duration of the assignment unless there is prior approval for the absence. The intern will be responsible for assuring attendance at a minimum of 80% of all scheduled presentations including, but not limited to Seminars and Psychology Clinical Case Presentations. Where feasible, attendance will be monitored via sign-in sheets. Where applicable, attendance criteria include completion of evaluation forms.

Program completion requires 2080 hours (minus leave taken) of internship training activities under clinical supervision (two hours of individual supervision, two hours of group supervision). Performance evaluation of and feedback to interns by clinical supervisors and other internship faculty is continuous; however, more formal evaluations are completed at the end of each rotation, as well as at the mid-point and end of the internship year.

For Interns to maintain good standing in the program they must:
- For the first rotation, obtain ratings of at least a "3" [Moderate supervision required on most straight forward cases/projects] for all competency items on the Intern Evaluation Form
- For the second rotation, obtain ratings of at least a "4" [Minimal supervision required on most straight forward cases/projects] for all competency items on the Intern Evaluation Form
- Not be found to have engaged in any significant unethical behavior
For Interns to successfully complete the program, they must the following Minimum Levels of Achievement (MLAs):

- By the end of the last training period, obtain ratings of at least a "5" [Able to enter the field as a postdoctoral fellow and/or early career psychologist] for all items in each competency area on Intern Evaluation Form
- Not be found to have engaged in any significant unethical behavior

**ROTATION DESCRIPTIONS**

**Outpatient Mental Health – PTSD Specialization**

This rotation, under the supervision of Dr. Daniel Gonzales, provides the intern a training opportunity in developing clinical competencies and experience in a broad array of clinical and clinical administrative activities in the context of an interdisciplinary outpatient mental health and substance abuse treatment program (Social and Behavioral Health Service; SBHS). SBHS is a full-service outpatient clinic that serves individuals with a wide range of emotional, social, and psychiatric problems. Clients represent a full diagnostic range with clients presenting with co-morbid substance abuse/dependence diagnoses and histories of complex trauma. A significant number of our clients are returning veterans from Operation Iraqi Freedom (OIF), Operation Enduring Freedom (OEF), and Operation New Dawn (OND). Given the complexities of living and traveling (i.e., planes, boats, snow machines) in Alaska, interns will have the opportunity to provide mental health services through tele-mental health.

Interns on this rotation will enhance their ability to deliver recovery-oriented services to this full range of clinical presentations with specialized experience in PTSD. Rotation training experiences in PTSD treatment include evidence-based individual therapies (Cognitive Processing therapy or CPT and Prolonged Exposure or PE) and psychoeducational group therapies as well as evidence based group therapy (CPT). Interns will also get the chance to learn and implement Acceptance and Commitment Based Therapy (ACT) for veterans with PTSD. Additional experiences include co-facilitating or facilitating psychotherapy groups, providing triage for clients in acute distress, intake evaluations and treatment planning, psychological assessment and testing, and consultation to primary care providers and to other interdisciplinary clinicians. Additional experience is available for program development to enhance the PTSD program described above.

*Training in Evidence-Based Therapies (EBTs):* Our program emphasizes training in clinical skills and recognizes that clinical work is informed by well-designed research. As
part of our commitment to this model, training in EBTs is a strong focus of our program. All psychologists in the Specialty Mental Health clinic have training in EBTs, and most are certified through the VA. The interns will receive both didactic training and in vivo experience providing these therapies as they move through the various rotations. Each intern will select an EBT in which he/she wants to gain in-depth training and will be paired with a clinician certified in that specific treatment modality. The clinician will serve as a mentor and will train the intern in conceptualization and techniques inherent to the chosen EBT. Emphasis is provided in Cognitive Processing Therapy (CPT) and Acceptance and Commitment Therapy (ACT).

In addition to PTSD-related treatment modalities, interns will have the opportunity to work with our Transgender Veterans Support Group, and participate in discussions related to numerous aspects of the transition process. We are committed to supporting and promoting the full spectrum of services to our LGBT Veteran community.

This rotation also offers training opportunities for family and couples therapies, including the REACH program (group therapy for couples in which one member suffers from a chronic mental illness), Emotion-Focused Therapy, and Integrated Behavioral Couples Therapy.

**Primary Care Mental Health Integration (PCMHI)**

Under the supervision of Dr. Ian Carpenter, interns will provide an array of brief, focused psychological services for primary care patients with various mental health conditions (depression, anxiety, etc.) and physical health conditions (chronic pain, tinnitus, obesity, etc.). In this setting, an intern will function as the mental health and behavioral change expert for the primary care Patient Aligned Care Teams (PACTs). Interns will be collocated and collaborate with a multidisciplinary staff involved in primary care, chronic disease management, and health promotion / disease prevention. Interventions include brief cognitive behavioral therapy for insomnia, chronic pain management, relaxation training, motivational interviewing with a health-related focus, and consultation/supervision. As brief evidenced based protocols for a PCMHI setting become available within the VA, interns will be introduced to these interventions. Within this rotation, interns are allowed the opportunity to gain experience in several areas while also pursuing individualized goals.

Also, interns on this rotation help facilitate variety of behavioral health groups including a Depression and Anxiety Management group, a Cognitive-Behavioral Therapy for Chronic Pain group, and a MOVE! weight loss group. Supplementary group therapy experiences that are available depending on intern interest include an interdisciplinary Tobacco Cessation group and an upcoming Cognitive Behavioral Therapy for Insomnia group (end of 2019).

Measurement-based care is fully integrated into the PCMHI rotation, and interns will regularly administer and interpret brief screening measures (e.g., PHQ-9, GAD-7, AUD-C) to aid in clinical decision making and track progress in treatment over time. Interns are asked to assist the primary care team in suicide risk identification, which may include
use screening measures such as the Columbia-Suicide Severity Rating Scale (C-SSRS) or the VA’s Comprehensive Suicide Risk Evaluation (CSRE). Selection of other brief screening instruments will vary depending on clinical need (e.g., PCL-5, MOCA, SLUMS).

**Optional Pre-procedure Mental Health Evaluation experience:** Based on an intern’s interest, during the PCMH rotation, they may also participate in pre-procedure mental health evaluations for bariatric surgery, solid organ transplant candidates, and pain/spinal stimulator surgery.

**Mental Health Residential Rehabilitation Treatment Program**

The Alaska VA Mental Health Residential Rehabilitation Treatment Program (MH RRTP) consists of a 50-bed facility coupled with several transitional residences that incorporate efforts to address housing, employment, and health care for Veterans within a recovery-based model. The Alaska VA MH RRTP contains two treatment tracks, which are the Substance Abuse Residential Rehabilitation Treatment Program (SARRTP) and Domiciliary Care for Homeless Veterans (DCHV). Clients within the SARRTP engage in a residential level of care to address substance use disorders, while those in the DCHV program focus on establishing housing and community reintegration to a relatively greater extent. Veterans may transfer between these two residential program tracks during their stay, often initially entering the SARRTP and later transitioning into the DCHV program prior to community reintegration based on the degree of their substance use difficulty and housing status. Veterans typically reside within the Alaska VA MH RRTP for several months and work toward addressing unemployment, homelessness, and mental health problems such as substance use, depression, and trauma. Accordingly, an emphasis on this rotation is for interns to expand their clinical skills to effectively deliver empirically-based interventions for Veterans’ mental health needs. Opportunities exist for individual assessment and therapy, a variety of group therapies, and participation in multidisciplinary treatment teams. Interventions are typically cognitive-behavioral in nature, as well as including elements of motivational interviewing, mindfulness-based stress reduction, and integrated efforts to address comorbid conditions. Interns currently co-facilitate several groups with psychology staff, including Mindfulness-Based Stress Reduction, Talking Circles, CogSmart, and Seeking Safety. Depending on training needs and interest, there is also the opportunity to engage in local program development, assist with community outreach activities, observe justice outreach activities such as Veterans Court, and develop and implement short-term groups during the rotation. Specific training goals include increased familiarity with residential care, ability to provide psychological services within a residential treatment setting, and utilization of empirically-based practices such as MI/CBT to address substance use. Supervision for MH RRTP activities will be provided by Drs. Cale Palmer and Jayson Hsieh.

Goals:
- Familiarity with VA MH RRTP models (SARRTP/DCHV) and issues addressing substance use and homelessness within residential treatment programs
- Ability to deliver psychological services within an interdisciplinary residential treatment program, including diagnostic assessment, intervention, and case consultation
- Specific familiarity and effectiveness with utilizing motivational interviewing and cognitive-behavioral strategies for substance use disorders

**TRAINING FACULTY**

We have 11 doctoral psychologists representing diverse theoretical orientations, clinical specialties, and interests. Some have had academic appointments at the University of Alaska Anchorage. The staff is experienced and highly committed to clinical service and professional training.

**Ian C. Carpenter, Psy.D.**
Degree: Psy.D.
Date of Degree: 2015
University: University of La Verne, CA
Primary Clinical and Research Interests and Expertise: Psychological assessment, Program development, Trauma, Military psychology, Consultation, Clinical Training, Crisis intervention, and the intersection of Technology and Psychology. DoD trained in evidenced-based treatment for PTSD (CPT & PE) and cognitive behavioral therapy for Depression and Insomnia (CBT-D, CBT-I).
Personal Interests: International travel, video games, Brazilian Ju Jitsu, hiking, and spending time with family.

**Jill M. Duke, Ph.D.**
Degree: Ph.D., Clinical Psychology
Date of Degree: 2012
University: Washington State University
Primary Clinical and Research Interests and Expertise: Behavioral Medicine, Geropsychology, Motivational Interviewing, Home-based Primary Care, Psychooncology, Chronic Pain, Rehabilitation psychology, Self-regulation Model of Illness.
Personal Interests: Mountain biking, snowboarding, cross-country skiing, hiking, traveling, brewing, attending concerts, mycology.

**Daniel S. Gonzales, Ph.D.**
Degree: Ph.D., Counseling Psychology
Date of Degree: 1988
University: University of Missouri-Columbia
Primary Clinical and Research Interests and Expertise: Psychology Training, Assessment and treatment of Post Traumatic Stress Disorder; Prolonged Exposure Therapy; Forensic Psychology, Behavioral Sleep Medicine, Animal-assisted Therapy.
Personal Interests: Bicycling, Cross-Country Skiing, Fine food/wine, astronomy/stargazing (only in winter!), American history.
Kun-Yueh (Jayson) Hsieh, Ph.D.
Degree: Ph.D.
Date of Degree: 2014
University: Palo Alto University
Primary Clinical and Research Interests and Expertise: Rural Mental healthcare service delivery in Bush Alaska, PTSD and severe mental illness in adult populations. Areas of specialty include EMDR for individuals with traumatic history, and Mindfulness-based intervention as applied to a broad range of psychopathology.
Personal Interests: Biking, Cooking, and Meditation

Ann G. Hutcheson, Psy.D.
Degree: Psy.D., CADC1
Date of Degree: 2011
University: Pacific University
Primary Clinical and Research Interests and Expertise: Evidence-Based Psychotherapies, PTSD/SUD treatment, Complex trauma, VA certified in Acceptance and Commitment Therapy, VA certified in Cognitive Processing Therapy
Personal Interests: Spending time with my family hiking, fishing, boating, and hunting.

Lahela A. R. Jorgenson, Psy.D.
Degree: Psy.D., Clinical Psychology
Date of Degree: 2018
University: University of Denver
Primary Clinical and Research Interests and Expertise: Cultural Diversity, Military Sexual Trauma, Psychological Assessment, Program Development, Consultation, Crisis Intervention, Severe Mental Illness, CPT, ACT, CBT (depression, insomnia, chronic pain), and Families/Couples (EFT)
Personal Interests: Water sports, snowboarding, community service, cultural activities, family time, dogs

Camilla A. Madden, Ph.D.
Degree: Ph.D., Counseling Psychology
Date of Degree: 1990
University: University of Miami
Primary Clinical and Research Interests and Expertise: Cultural Diversity, Psychosocial Rehabilitation Recovery Model, Homeless Veterans Services, VA Therapeutic and Supported Employment Services, Acceptance and Commitment Therapy, Mental Health Consumer Advocacy and Lesbian, Gay, Transgender and Intersex Issues, Family/Couples Therapy
Personal Interests: To relax, I love cooking, reading, gardening, hiking, tennis, and boating in Prince William Sound. I enjoy attending theatrical productions and cultural fairs and being part of conservation and environmental causes such as the time I spend with the Friends of the Alaska National Wildlife Refuge participating in beluga counts and sand hill crane observations.

D. Rush McQueen, Ph.D.
Degree: Ph.D., Clinical Psychology  
Date of Degree: 2004  
University: Auburn University  
Primary Clinical and Research Interests: PTSD, Telemental health, Psychology training  
Personal interests: Traditional archery, camping, bushcraft, gardening, and time with my family.

**Cale Palmer, Ph.D.**  
Degree: Ph.D., Clinical Psychology  
Date of Degree: 2009  
University: University of Hawaii at Manoa  
Primary Clinical and Research Interests and Expertise: Motivational interviewing and cognitive behavioral therapies, evidence-based practices, military psychology, health psychology, cognitive functioning, and the development and utilization of technology within psychology.

**Tirzah Shelton, Psy.D.**  
Degree: Psy.D.  
Date of Degree: 2019  
University: Our Lady of the Lake University, San Antonio Texas  
Primary Clinical and Research Interests and Expertise: Solution-Focused Brief Therapy, Narrative Therapy, Cognitive Behavioral Therapy, and Motivational Interviewing. My research interests are centered on illuminating first person perspectives as a critical means to improve policy and therapeutic practices. I have completed research in the context of military suicide underscoring contextual features in choosing life.

**Kelley A. Tompkins, Ph.D.**  
Degree: Ph.D.  
Date of Degree: 2019  
University: University of Alaska, Anchorage  
Primary Clinical and Research Interests and Expertise: Behavioral Medicine; Motivational Interviewing; Psychotherapy Process and Outcome Research; Prevention; Program Development, Cross Cultural and Rural Psychology,  
Personal Interests: triathlons/running, hiking, photography, travel, spending time with my family, reading, watching musicals and art/graphic design.

**ALUMNI**  
As seen below, our interns come from all over the country; we tend to attract candidates who have variable levels of experience with Alaska, from being lifelong Alaskans to those who have never been here. All interns have had a curiosity and desire to expand their professional horizons, and had a training experience unlike any in their graduate practica.
We are happy to report that of all alumni of our program who are license-eligible, 100% have gotten their license to independently practice psychology!

Although we do not have a post-doctoral fellowship in our training program, since 2008 we have directly hired 8 interns from internship as staff psychologists (N=25 total interns thus far). We feel this is as good an indicator as any of the overall quality of our training experience. Our graduates work in a variety of settings, including at five other VA Medical Centers.

2019 Graduates
Our Lady of the Lake University, Psy.D. Counseling Psychology
The Wright Institute, Psy.D. Clinical Psychology
Wheaton College, Ph.D. Clinical Psychology

2018 Graduates
University of Alaska Anchorage/Fairbanks, Ph.D. Clinical-Community Psychology
Florida Institute of Technology, Psy.D. Clinical Psychology
Fielding Graduate University, Ph.D. Clinical Psychology

2017 Graduates
Chicago School of Professional Psychology, Psy.D. Clinical Psychology
Chicago School of Professional Psychology, Psy.D. Clinical Psychology
Adler School of Professional Psychology, Psy.D. Clinical Psychology

2016 Graduates
Pacific University, Psy.D. Clinical Psychology
Central Michigan University, Ph.D. Clinical Psychology
California School of Professional Psychology, Ph.D. Clinical Psychology

2015 Graduates
Florida State University, Ph.D. Counseling Psychology
Pacific University, Psy.D. Clinical Psychology
Ponce School of Medicine, Psy.D. Clinical Psychology

2014 Graduates
Massachusetts School of Professional Psychology, Psy.D. Clinical Psychology
California School of Professional Psychology, Ph.D. Clinical Psychology
George Fox University, Psy.D. Clinical Psychology

2013 Graduates
Regent University, Psy.D. Clinical Psychology
Seattle Pacific University, Ph.D. Clinical Psychology
Pacific University, Psy.D. Clinical Psychology

APPLICATION AND SELECTION PROCEDURES
Our internship seeks applicants who are graduate students in good standing in a clinical
or counseling psychology program approved by APA (Ph.D. or Psy.D.). We are seeking applicants who are interested in obtaining a generalist training with an emphasis on cultural diversity and service delivery in urban, rural, and frontier healthcare environments. As an equal opportunity training program, the internship welcomes and strongly encourages applications from all qualified candidates, regardless of gender, gender identity, age, religion, racial, ethnic, culture, nationality, socioeconomic status, sexual orientation, disability or other minority status.

To apply, submit the following materials electronically through the on-line APPIC Application for Psychology Internships:

- APPIC Application for Psychology Internships (APPI), which includes a detailed vita describing background training, experience, and scholarly activity and research, three letters of recommendation, and official transcripts of your graduate work sent directly by your university.

**APPIC Program Number:** 2067  
**NMS Match Number:** 206711

**Deadlines**

Deadline for completed applications is **November 1, 2019** for the fall of 2019. Applicants will be notified of invitation for phone interviews **December 14, 2019**.

**Additional Information**

This internship site agrees to abide by the APPIC policy that no person at this training facility will solicit, accept or use any ranking-related information from any intern applicant.

Note: A CERTIFICATION OF REGISTRATION STATUS, CERTIFICATION OF U.S. CITIZENSHIP, and DRUG SCREENING are required to become a VA intern. The Federal Government requires that male applicants to VA positions who were born after 12/31/59 must sign a Pre-appointment Certification Statement for Selective Service Registration before they are employed. It is not necessary to submit this form with the application, but if you are selected for this internship and fit the above criteria, you will have to sign it. All interns will have to complete a Certification of Citizenship in the United States prior to beginning the internship. We will not consider applications from anyone who is not currently a U.S. citizen. The VA conducts drug screening exams on randomly selected personnel as well as new employees. Interns are not required to be tested prior to beginning work, but once on staff they are subject to random selection as are other staff.

**OPEN HOUSE**

After applicants are notified of invitation for phone interviews December 14, 2018, interviews will take place during the first several weeks of January, 2019. Once interviews are complete, we will then submit our rankings during the fourth week of January. Afterward, the internship will host an Open House for all interviewees, which will be held on **Friday, January 31, 2020**. Please note that because our rankings will have already been submitted to APPIC, there will be no evaluation of applicants during the Open House.
– the pressure will be on us, not you! We arrange it this way in part to offer a relaxed opportunity to get to know us better, but also to respect your time and money during the challenging month of interviews around the country. Unless you live in Alaska (or Seattle), at least two days are required to have a good face-to-face interview here, costing an average of about $2,000. We feel a sense of social and economic justice to not penalize applicants who cannot visit, as well as a desire to welcome those who do choose to visit. Attire is business casual, and we will provide lunch.
The Alaska VA Healthcare system is located in Anchorage, Alaska, a city of nearly 300,000 people, or roughly the population of Cincinnati, Ohio or Pittsburgh, Pennsylvania. Due to the large land area of the Anchorage, the city is not densely populated, with only 171 people per square mile. When considering the outlining Matanuska-Susitna Borough, the population of the total Anchorage metropolitan area is over 400,000 people. This one area is the population center of the state, and includes slightly over half of the Alaskan population. Anchorage is located on the Kenai Peninsula in south-central Alaska, bordered by the Knik Arm of the Cook Inlet to the north, and the inlet’s Turnagain Arm to the South. To the east, the city is flanked by the Chugach mountains and the 495,000-acre Chugach State Park. The city has various economic sectors, including resource development, tourism, education, government and transportation. Anchorage is also home to the state’s largest public university, the University of Alaska Anchorage which has a student population of almost 18,000. The city has a large military presence with the Joint United States Army and Air Force Base Elmendorf-Richardson.

One of the most surprising aspects about Anchorage to newcomers is the amazing diversity of cultural and cultural influences in the community. In terms of ethnic diversity, the U.S. Census estimates that most common racial groups in Anchorage include Caucasian (65%), Asian (9.6%), multiracial (8.2%), Alaska Native/American Indian (8.7%), Black/African American (6.1%) and Native Hawaiian/Pacific Islander (2.5%). Anchorage is a city of tremendous diversity, including the three most diverse US Census tracts in the country. The Anchorage School District includes 96 different languages among its student population, including numerous Native Alaskan languages. Anchorage also has an active LBGT community, led by the Identity Alaska organization.

The beauty of Anchorage is unquestionable. In addition to the perks of city living, Anchorage residents also have access to the magnificence of Alaskan wildlife. While many types of wildlife are readily seen within the city, residents can also travel to the various state parks and areas
outside of the Municipality to see wildlife in its most natural habitat. Anchorage has received numerous acknowledgments of its status as a great city to live in. Anchorage has won the National Civic Leagues’ All-American City four times (1956, 1965-1984-85 and 2002). The Anchorage Economic Development Commission’s “Live. Work. Play.” Initiative recently announced that by 2015, Anchorage will be the #1 city in the country to live, work and play!

Climate
Newcomers to Alaska are often concerned about the possibility of frigid temperature and icy/snowy roads. January tends to be the coldest month of the year in Anchorage, with average lows of 11 degrees Fahrenheit and average highs in the low twenties. Many Alaskans aim to take vacations during this December to February timeframe to get a brief reprieve from the cold temperatures, and many people utilize auto-starts to warm up their cars, and heated blankets to provide extra warmth. In contrast, the summer months in Anchorage have average temperatures of low 50s to mid-60s. In terms of precipitation, Anchorage averages from a high of 3.27 average inches of precipitation in August to a low of 0.47 average inches of precipitation in April. December tends to be the month with the largest average snowfall, with average 17 inches of snowfall.
Living in Alaska offers a unique experience in the seasonal daylight fluctuations of arctic living. On the Winter Solstice in December (the shortest day of the year), Anchorage will see around 5 ½ hours of sunlight, with the sun rising slightly after 10:00 am and setting between 3:30 and 4:00 pm. Many Alaskans look forward to the Summer Solstice in June, where they bask in over 19 hours of sunlight, with the sun only briefly dipping behind the horizon below midnight until it rises again just after 4:00 am. When you consider civil twilight, the phase of twilight in which the sun is just below the horizon and there is still visible natural light, there are 24 hours of combined daylight and civil twilight in Anchorage for most of the month of June and early July. Alaskan take advantage of these extra hours of sunlight to enjoy the natural beauty of Alaska.

**Recreational Activities**

The opportunity for recreational activities in Anchorage is abundant, and tends to vary by season. Local retail shops, such as REI, provide gear rents so interns can try new outdoor activities without having to purchase gear.

In the winter months, many Alaskans enjoy from downhill skiing at the Alyeska Ski Resort or Hatcher’s Pass, to backcountry or cross-country skiing on many groomed and ungroomed trails both inside and outside of the Municipality of Anchorage. The 1,400-acre Kincaid Park, nestled up against the Turnagain Arm, is a popular spot. Ice skating is another popular past-time, with residents skating or playing hockey on Westchester Lagoon or local lakes such as Eklutna Lake. Other winter recreational activities include taking a dog sled tour ride, snow machining or snow shoeing. More adventurous residents also do ice climbing. The winter is also the perfect time to camp out to see the awe-inspiring starlight sky and legendary Northern Lights, which are occasionally visible from in the city, although views are almost always more impressive in the backcountry and further north.
In the summer, Alaskans have access to the wonder of the Alaskan frontier. Within the city, Anchorage residents enjoy the local Coastal and Campbell Creek trail systems, which sprawls from one side of the city to the other, to roller blade, bike, run or walk their pets. Residents can also fish in numerous municipal lakes, or Ship Creek, which is only a few minutes’ walk from downtown Anchorage. People can also travel only a few hours outside the city to various fishing towns on the Kenai Peninsula including Seward, Whittier and Homer. Many people take fishing charters or wildlife tours of the Prince William Sound of Kenai Fjords National Park from these towns, witnessing the splendor of Alaskan sea life, including beluga whales, puffins, sea otters and sea lions. Many wildlife tours also show local glaciers, such as the Portage glacier. For people willing to travel a few hours outside of Anchorage, the Denali National Park, with the United States' tallest mountain, Denali (formerly known to residents of the “Lower 48” as Mt. McKinley) is available for exploration. Alaskans take advantage of the seemingly endless sunlight to hike, camp and backpack. A favorite introductory hike is Flattop Mountain, located in the Chugach range and offering breathtaking views of the city and inlet. There are many public use cabins that are available for rent. Other popular outdoor recreational activities include kayaking (lake or open water), canoeing, or rock climbing. It is also common to see people berry picking both in the Chugach Mountains and further outside the city. Anchorage also has a beautiful 100-acre Botanical Garden.

Alaskans are very active, and there are numerous sporting events available. In the summer, running races are abound. Local favorites include the Mayors Midnight Sun Marathon (5k, half-marathon, marathon or marathon relay) near the summer solstice and the Anchorage RunFest (5k, half-marathon, Marathon or 49K Ultra race). During the July 4th holiday, individuals can sign up for the Mount Marathon race, a competitive 5k race up and down the rocky 2,974-foot Mount Marathon in Seward, Alaska. Many Alaskans choose to witness this event while enjoying the local food festival. There are also several popular bike races, winter ski races or winter snow machine races.

**Entertainment, Culture and the Arts**

While Anchorage does provide great recreation options for active people, it also has
several opportunities for rich entertainment and cultural pursuits.

There are many festivals that are popular for Alaskans. In February people can attend the Fur Rendezvous (Fur Rondy) festival, which showcases a snow sculpture competition, a carnival, a Beard Contest, a Running of the Reindeer event, a Fur Auction and a Miner’s and Trapper’s Charity Ball. This festival coincides with the annual Iditarod Trail Sled Dog Race, an 1,100 race from Willow to Nome (ceremonial start in Anchorage). Other popular festivals include the Bear Paw Festival and the Girdwood Forest Fair.

Individuals who love history can enjoy various venues including the Anchorage Museum and the Alaska Native Heritage Center. The Museum even have select Sundays where admission is free. At the Alaska Native Heritage Center, people can explore replicas of traditional dwellings of Alaska Native peoples (Athabascan, Inupiaq, Yupik, Aleut, Tlingit, Haida, Tsimshian, etc.) across the state, as well as watch Alaska Native dance and drumming performances, watch cultural films, and purchase Alaska Native art and jewelry. History lovers can also take a step back in time with gold panning pursuits, available in Crow Creek and Indian Valley, just outside of Anchorage. Another incredible cultural activity is the Native Youth Olympics. This annual event showcases Alaskan middle and high schoolers competing in 10 traditional Alaskan events that were tests of hunting and survival skills, and used to practice and refine agility balance and strength.

For the artistic types, Anchorage has The Performing Arts Center which showcases many types of performances including Broadway musicals, dance numbers, opera and symphony performances. Recent musicals include Rodgers and Hammerstein’s Cinderella, the Lion King, Little Shop of Horrors and My Fair Lady. There are also many
local theatre companies. Many musical performances come to both the Alaska Airlines Performing Center or the Alaska State Fair. Recent musical performances at these venues included the Zac Brown Band, the Goo Goo Dolls, Third Eye Blind, The Band Perry, Old Dominion, Norah Jones, and Alaska’s own Portugal. The Man. Anchorage also hosts a First Friday Art Walk in Downtown Anchorage, where people can tour downtown art galleries.

Anchorage also has a booming brewery industry - Alaska is the sixth highest per capita of craft breweries in the country. It culminates in the annual Great Alaska Beer and Barleywine Festival every January.

**Housing**

According to Zillow, as of January 2018, the median cost in Anchorage for a one-bedroom rental was $855/month, $1200 for a two-bedroom rental and $1700/month for a three-bedroom rental.

**Transportation**

Many Alaska VA employees either live in Anchorage or the Eagle-River/Mat-Su Valley area. Within Anchorage, commute times at the most will be 25-30 minutes, if the employee lives on the other side of town. Commute for employees working within the Eagle-River/Mat-Su Valley is approximately 35-40 miles. Free parking is provided. The local bus system, the People Mover, provides transportation within Anchorage, with a bus stop right outside the main VA clinic. However, some areas of town do not have frequent bus travel, making this form of public transportation not always practical for VA employees. The Municipality of Anchorage also provides a RideShare program that helps coordinate local carpooling and provides vanpool group subsidies. There is a free shuttle that runs between the main Alaska VA clinic and the VA Domiciliary, about 8 miles away, to which both Veterans and employees can utilize. Anchorage also has Uber and Lyft services. While there are public transportation options, many interns have found it useful to have their own car.

For travel within and outside of the state, Alaskans can utilize the road system, train and airplanes. While there are many rural villages in Alaska that are outside of the road system (and require a bush plane flight, snow machine or dog sled to get to), Alaskans can travel the 358-mile Parks Highway from Anchorage to Fairbanks, passing through the beautiful Denali National Park, home of the tallest mountain in the United States, Denali (formerly known to nonlocals as Mt. McKinley). Alaskans also frequently travel on the scenic Seward Highway from Anchorage to the fishing village of Seward, a favorite spot for fishing charters and scenic tours of Kenai Fjords National Park. People who are driving from the lower 48 to Alaska often travel through Canada along the Alaska-
Canadian Highway (ALCAN). Those with an interest in history can travel the 470-mile Alaska Railroad, stretching from Seward to Fairbanks. For airplane travel, the Ted Stevens International Airport, about 13 miles away from the Alaska VA, provides international travel on many major commercial airlines (Alaska Airlines, United Airlines, Delta, American Airlines) on frequent daily schedules.
